Title - Chairback Bible/Book Holder

Inventors - Hilda Virginia Martin & Josephine Almeda Gatling

Provisional Number 60/411.639

SUMMARY OF INVENTION

PURPOSE - This invention is a useful item of support for use at such places such as conferences, workshops, churches and schools. It will allow users hands freedom to write and/or handle other materials in meetings, or personal use in office, or home. Prior to this useful invention people have clumsily tried to stabilized books and other materials on their laps.

CONSTRUCTION - The Chairback Bible/Book Holder is a one piece unit and made of light acrylic material, which makes it easy for transporting. The holder can also be a custom fit permanent attachment to chairs.

TITLE – CHAIRBACK BIBLE/BOOK HOLDER

PROVISIONAL NUMBER – 60/411,639

INVENTION DESCRIPTION

The physical structure of the Chairback Bible/Book Holder consist of the following elements illustrated in Fig. II. A, B, C, D, E. Acrylic is the material used to construct this invention. The base Fig. A is a two inch acrylic extension lever attached across the front bottom side of Fig. C.. This extension is the ledge that supports the book. Fig. C. is the boxed container attached on the front side of Fig. D. to hold writing materials and other useful literature of user. Fig. B. is the lower arm attached to the bottom center of Fig. D. (the back section of the holder) and placed against the chairback to support the entire holder. Fig. B. is attached with hinges to back of holder and folds up against back of holder when not in use. Fig. E. is the chairback overlay support arm attached with hinges on each extreme ends to top section Fig.D. and fits over the chairback.

INVENTION DESCRIPTION

TITLE - CHAIRBACK BIBLE/BOOK HOLDER

INVENTORS - Hilda Virginia Martin/Josephine Almeda Gatling
